Antimicrobial resistance

Neurodegenerative diseases

Prevention

Environment and health

Active and healthy ageing

Nano technology and robotics

Regenerative medicine

ACCOMPANYING ISSUES:

- Health system reform
- Health economics
- Law and regulations
- Policies (health policy, research policy etc.)

RANGE OF DISEASES

Rare disease

Genomics medicine

Innovative medicine

Noncommunicable disease

Personalised medicine & health

ICT driven integrative biomedicine

Smart and secure databases, data analysis and interpretation

Decision support systems

New diagnostics

Big data and large scale research infrastructure

European health research priorities

This poster is the result of informal discussions amongst RTD Liaison Offices about European health research priorities for FP9.
